Front end Specialization

1.1: Getting Started with Your Frontend Course

Priya basina 02/20/2021

Part 1

➔ INTRODUCTION

Hi there! I'm a UI/UX Designer in Raleigh, North Carolina. I relentlessly push and pull to create aesthetically pleasing UI and build satisfying product experiences for users.

➔ PROJECTS

TRIP HOME

Find a vacation stay that feels like home with all the comforts you need. An e-commerce responsive website that provides the platform to people for earning by offering lodging and hospitality.

CASH TRAC

The Money management responsive website helps Connecting with your financial accounts, track spending, and categorize expenses so you can see where your money is going.

GRO

Do you forget to water your plants? Get notified when it's time to water your plants—a Native app for both iOS and Android devices.

Part 2

➔ ABOUT ME

I'm always curious to carry out an in-depth study on a topic that interests me. I enjoy the ingenuity in the use of technical resources to make innovative work. I am continually improving myself and striving to keep things orderly, whether in the workplace or in my personal life.

Design was just one of my hobbies, which kept growing to the extent that I wanted to turn it into a full-time career. Since then, I've been continuously searching for online resources and tutorials for improvement, but my journey as a designer began when I worked on a game application project as a tester. Though I was primarily responsible for checking quality control of the software, I had an opportunity to be involved in user research and design phases. That journey had taught me how user-centric designs are crucial to the success of the product. That's when I was interested to learn more about user experience and interface design and joined in Career foundry.

 I am currently completing my training in front-end development (HTML, CSS, JavaScript), taking part in design-related events, and continuing to learn, grow and evolve.

SKILLS

Competitor Research	A/B & preference Testing
